

Data Quality Report

Input file: data/sample/customers_large_dirty.csv

Summary

Status
failed

Quality score
50.0%

Checks
1 / 2 passed

Insights

- Dataset contains 20008 rows and 9 columns.
- Overall quality score is 50.0%.
- 1 validation check(s) failed.
- Check 'not_null_columns' failed.
- Column 'name' contains 79 null value(s).
- Column 'email' contains 145 null value(s).

AI Summary

Dataset quality summary

The dataset failed 1 validation check(s). Failed checks: not_null_columns. These issues should be reviewed before using the dataset in production analytics.

Recommendations

- Review failed validation checks.
- Investigate affected columns in the source data.
- Consider adding stricter checks to the ingestion pipeline.
